

Credit actions

From the live app and SQL as of 10 September 2026. Amounts are per event. Credits cannot be bought.

Actually credited to the balance

These write `user_profiles.credits`.

ACTION	WHO GETS IT	CREDITS	WHERE
Someone likes your mix	Mix owner	+10	adjust_mix_like_credits
Someone unlikes your mix	Mix owner	-10	adjust_mix_like_credits
A DJ signs up with your invite code	Referrer (you)	+25	process_referral
A DJ completes a gig on an opportunity you posted	Opportunity submitter (not the performing DJ)	+15	award_opportunity_submitter_credit
Boost your application for 24 hours	You (spend)	-10	boost_application

Achievement badges (configured, not added to balance)

`credits_reward` is stored on the achievement and shown in the UI. `check_and_award_achievements` only inserts `user_achievements` — it does not increment credits.

ACHIEVEMENT	HOW YOU EARN IT	LISTED REWARD
First Gig	Complete 1 gig	+10
Social Butterfly	Connect with 2+ DJs	+15
First Mix	Upload 1 mix	+10
5-Star Rating	4.8+ average rating	+50
10 Gigs	Complete 10 gigs	+100
Verified Artist	Get verified	+100
Community Builder	Connect with 50+ DJs	+150
Top Performer	4.9+ rating and 20+ gigs	+200
50 Gigs	Complete 50 gigs	+500

Not credited today

Performing a gig yourself does not add credits. `docs/CREDITS_SYSTEM.md` mentions `award_gig_credits` (+10), but that function is only in a test script — there is no migration that creates it. The new DJ also gets nothing for using an invite code; only the referrer gets +25.
